Professional Summary

Web Developer with **2+ years** of hands-on experience specializing in **WordPress, WooCommerce, and Shopify** development. Proficient in **PHP, HTML5, CSS3, JavaScript (ES6+), jQuery, React.js, Tailwind CSS, and Bootstrap**. Successfully built and maintained **15+ live production websites** including e-commerce stores, business websites, and custom WordPress themes. Currently managing a complete **B2B/B2C Shopify e-commerce platform** independently. Strong experience in **CMS customization, theme development, payment gateway integration (Razorpay, Stripe), WooCommerce store management, and deployment** on platforms like Vercel and Railway. Looking for a challenging role in **web or e-commerce development** where I can contribute and grow technically.

Technical Skills

CMS & commerce	E- WordPress (Custom Themes, Child Themes, Elementor, WPBakery, Custom Post Types, ACF), WooCommerce (Store Setup, Product Management, Payment Integration, Checkout Customization), Shopify (Liquid, Sections, Theme Customization, App Integration)
Frontend	HTML5, CSS3, JavaScript (ES6+), jQuery, React.js (Hooks, Components, Props, State, Context API), Responsive Design, Flexbox, CSS Grid, Cross-Browser Compatibility
Styling	Tailwind CSS, Bootstrap, SCSS, Figma-to-Code, Pixel-Perfect UI Implementation
Backend	PHP, Python, Django, Django REST Framework, MySQL, PostgreSQL, REST API Development, JWT Authentication
Tools	Git, GitHub, VS Code, Cursor IDE, cPanel, Postman, Figma, Vite, npm/yarn
Deployment	Vercel, Railway, Netlify, cPanel Hosting
Payments	Razorpay, Stripe
Other	SEO Basics, Core Web Vitals, Performance Optimization, Agile/Scrum, AI Tools (Claude, OpenAI APIs)

Professional Experience

Shopify Developer & Web Developer | *Siddhagiri Metals Pvt. Ltd., Mumbai* *Jan(2026) - Present*
Full-Time

- Developing and maintaining a complete **B2B/B2C Shopify e-commerce platform** for a metals trading business - handling store setup, theme customization, product catalog (**50+ SKUs**), and checkout flow independently.
- Customizing **Shopify themes using Liquid**, HTML, CSS, and JavaScript to build custom sections, landing pages, and UI components beyond default theme capabilities.
- Integrating **third-party Shopify apps** including payment gateways (Razorpay, Stripe), inventory management, and CMS workflows for streamlined online operations.
- Optimizing store performance through image compression, lazy loading, and asset optimization to improve page load speed and user experience.
- Managing the complete development lifecycle - requirements gathering, design-to-code, testing, deployment, and ongoing maintenance as the **sole developer** on the project.

- Developed responsive **React.js applications** using functional components and hooks (**useState, useEffect, useCallback**) with props-driven state management.
- Implemented **pixel-perfect UI** from Figma designs using Tailwind CSS across mobile, tablet, and desktop breakpoints.
- Built a **shared component library** to improve code reusability and reduce development time across the project.
- Utilized AI-assisted development tools (**Cursor IDE, Claude**) to accelerate code reviews and maintain clean code standards.

- Developed and maintained **10+ production WordPress websites** for international clients including *mycountrymobile.com, acepeak.ai, ringflow.com, teloz.com, callmama.com* - serving a combined **100,000+ monthly visitors**.
- Customized WordPress themes using **PHP, CSS, and JavaScript** - building custom post types, ACF fields, child themes, and template modifications beyond standard page builders (Elementor, WPBakery).
- Set up and customized **WooCommerce stores** with payment gateway integration (Razorpay, Stripe), product management, and checkout flow optimization for client e-commerce requirements.
- **Promoted to Acting Team Lead** - managed a team of 3-4 frontend developers during night operations, assigned tasks, reviewed code quality, and ensured on-time delivery of client projects.
- Reduced UI bug rate by **40%** by implementing systematic cross-browser testing across Chrome, Firefox, Safari, and Edge before each production deployment.
- Achieved consistent **85+ Google PageSpeed scores** through image optimization, caching configuration, and performance tuning.

Projects

15+ Live Production Websites

May(2024) - Dec(2025)

WordPress | PHP | WooCommerce | HTML | CSS | JavaScript | Elementor

- Developed and deployed **15+ production websites** for international clients including *mycountrymobile.com, acepeak.ai, ringflow.com, teloz.com, callmama.com, twiching.ai*.
- Built **custom WordPress themes** and WooCommerce stores using PHP, including custom post types, taxonomies, ACF fields, and tailored template-level modifications to meet specific client requirements.
- Implemented **payment gateway integrations** (Razorpay, Stripe) and customized checkout flows for e-commerce clients.
- Achieved consistent **85+ PageSpeed scores** across all sites through image optimization, caching, and performance tuning techniques.

AI Resume Analyzer - ATS Optimization Tool

Nov - 2025

React.js | Node.js | Claude API | OpenAI API | Tailwind CSS | Vercel

- Built an **AI-powered tool** that parses PDF resumes and provides ATS compatibility feedback using **Claude and OpenAI APIs**.
- Implemented PDF parsing, text extraction, and AI-based suggestions for resume improvement.
- Designed a responsive dashboard UI using **React.js and Tailwind CSS** with score visualization and section-wise analysis.
- Deployed on **Vercel** with optimized API handling and loading states.

Task Management System - Full Stack Web Application

May - 2026

Python | Django | Django REST Framework | JWT | PostgreSQL | React | Vite | Vercel

- Built a **production-ready full-stack task management system** with JWT-based authentication, supporting user registration, login, and secure password hashing using Django's PBKDF2 algorithm for complete session-less API security.
 - Designed and implemented a **normalized PostgreSQL database schema** with foreign key relationships between users and tasks, utilizing Django ORM with `select_related()` for optimized queries and N+1 problem prevention across **8+ REST API endpoints**.
 - Implemented **role-based access control (RBAC)** with custom DRF permission classes, enforcing strict edit boundaries - assignees can only update task status while assigners can only modify due dates - validated at both serializer and view layers.
 - Built a responsive **React frontend** using Vite, Context API for global state management, and Axios interceptors for automatic JWT token attachment, with proper handling of loading, empty, and error states across all user interactions.
 - Deployed backend on **Railway** with PostgreSQL and frontend on **Vercel**, configured CORS policies, environment variables, and SPA routing for full production reliability.
