AKASH GAUDA

Full Stack Developer | Shopify Expert | React.js Developer

Phone: +91-9324365583 | Email: akashgauda16@gmail.com

Portfolio: <https://gaudakash.github.io/AKASH-PERSONAL-PORTFOLIO/>

GitHub: <https://github.com/gaudakash> | LinkedIn: <https://www.linkedin.com/in/akashgauda16/>

Professional Summary

Full Stack Developer with **2+ years** of experience delivering **production-grade web applications** across React.js, Node.js, PHP, WordPress, WooCommerce, and Shopify. Contributed to **17+ live websites** and independently manages a **B2B/B2C Shopify e-commerce platform** end-to-end. Experienced in building **AI-powered tools** with Claude & OpenAI APIs, full-stack **MERN applications**, and custom CMS solutions with payment gateway integration. Comfortable owning complete project lifecycles — from requirements to deployment — both independently and within cross-functional teams.

Technical Skills

Frontend	React.js (Hooks, Custom Hooks, Context API, State Management), JavaScript ES6+, HTML5, CSS3, SCSS, Redux (Basic), TypeScript (Basic)
Styling	Tailwind CSS, Bootstrap, Responsive Design, Flexbox, CSS Grid, CSS Animations, Figma-to-Code, Pixel-Perfect UI Implementation
Backend	MERN Stack, Node.js, Express.js, PHP, MySQL, MongoDB, Mongoose, PostgreSQL, Django, Django REST Framework, REST API Development, API Integration, JWT Authentication, bcrypt, Database Design
CMS	WordPress (Custom Themes, Elementor, Custom Post Types, ACF), WooCommerce (Store Setup, Payments, Customization), Shopify (Liquid, Sections, Theme Dev), Shopify Storefront API
Tools	Version Control, Webpack / Vite, Git, GitHub, Vercel, Netlify, Railway, cPanel, Postman, Cursor IDE, VS Code, Figma, npm / yarn, GitHub Actions (Basic)
API	Claude API, OpenAI API, AI-Assisted Development, Third-Party API Integration
Payments	Stripe, Razorpay
Other	SEO Fundamentals, Core Web Vitals, Performance Optimization, AI Tools, Cross-Browser Compatibility, Agile/Scrum, Python/Django (Basics)

Professional Experience

Shopify Developer & Web Developer | *Siddhagiri Metals Pvt. Ltd., Mumbai*
Full-Time

Present

- Built and deployed a complete **B2B/B2C Shopify e-commerce platform** from scratch - handling store architecture, theme customization, product catalog (**50+ SKUs**), and checkout optimization **independently** with zero downtime incidents.
- Developed **custom Liquid templates**, JavaScript components, and CSS animations to create bespoke UI sections and landing pages beyond default theme capabilities - improving user engagement and conversion flow.
- Integrated **5+ third-party Shopify apps** including payment gateways (Razorpay, Stripe), inventory management systems, and CMS workflows to streamline the online buying experience for a metals B2B/B2C business.
- Optimized store performance achieving **90+ Google PageSpeed score** through image compression, lazy loading, script deferral, and asset optimization techniques.
- Owned the complete development lifecycle - requirements gathering, design-to-code, QA testing, deployment, and ongoing post-launch maintenance as the **sole developer** on the project.

- Developed responsive **React.js applications** using functional components and hooks (`useState`, `useEffect`, `useCallback`) with props-driven state management following modern best practices.
- Implemented **pixel-perfect UI** from Figma designs using Tailwind CSS with **100% design accuracy** across mobile, tablet, and desktop breakpoints for all assigned components.
- Improved component reusability by building a **shared component library** - reducing development time by approximately **30%** across the project.
- Utilized AI-assisted development tools (**Cursor IDE, Claude**) to accelerate code reviews and maintain clean code standards.

- Developed and maintained **10+ production WordPress websites** for high-traffic clients including *mycountrymobile.com*, *acepeak.ai*, *ringflow.com*, *teloz.com*, *callmama.com* - serving a combined **100,000+ monthly visitors**.
- Customized WordPress themes using **PHP, CSS, and JavaScript** - building custom post types, ACF fields, and template modifications beyond standard page builders (Elementor, WPBakery).
- Set up and customized **WooCommerce stores** with payment gateway integration (Razorpay, Stripe), product management, and checkout flow optimization for client e-commerce requirements.
- **Promoted to Acting Team Lead** within 8 months - managed a team of 3–4 frontend developers during night operations, assigned tasks, reviewed code quality, and ensured **100% on-time delivery**.
- Reduced UI bug rate by **40%** by implementing systematic cross-browser testing across Chrome, Firefox, Safari, and Edge before each production deployment.

- Built responsive UI components for **3+ SaaS and business websites** using HTML5, CSS3, and JavaScript ES6+ with focus on cross-browser compatibility and performance.
- Customized WordPress themes and implemented page-level improvements for client deliverables within a **tight 2-month turnaround**, meeting all project deadlines.
- Worked in an **Agile/Scrum team environment** - participated in sprint planning, daily standups, and peer code reviews to maintain delivery quality.

Projects

Task Management System — Full Stack Web Application

May 2026

Python | Django | Django REST Framework | JWT | PostgreSQL | React | Vite | Vercel

- Built a **production-ready full-stack task management system** with JWT-based authentication, supporting user registration, login, and secure password hashing using Django's PBKDF2 algorithm for complete session-less API security.
- Designed and implemented a **normalized PostgreSQL database schema** with foreign key relationships between users and tasks, utilizing Django ORM with `select_related()` for optimized queries and N+1 problem prevention across **8+ REST API endpoints**.
- Implemented **role-based access control (RBAC)** with custom DRF permission classes, enforcing strict edit boundaries — assignees can only update task status while assigners can only modify due dates — validated at both serializer and view layers.
- Built a responsive **React frontend** using Vite, Context API for global state management, and Axios interceptors for automatic JWT token attachment, with proper handling of loading, empty, and error states across all user interactions.
- Deployed backend on **Railway** with PostgreSQL and frontend on **Vercel**, configured CORS policies, environment variables, and SPA routing for full production reliability.

AI Resume Analyzer — ATS Optimization SaaS Tool

Apr 2026

React.js | Node.js | Claude API | OpenAI API | Tailwind CSS | Vercel

- Built a **production-ready AI-powered SaaS tool** that parses PDF resumes, evaluates ATS compatibility scores, and delivers intelligent keyword optimization suggestions using **Claude & OpenAI APIs** with **85%+ accuracy** in keyword gap identification.
- Implemented PDF parsing, text extraction, and **AI prompt engineering** to deliver context-aware, section-wise resume feedback with actionable improvement suggestions.
- Designed a clean, responsive dashboard UI with React.js and Tailwind CSS - featuring **score visualization**, section-wise analysis breakdown, and real-time AI feedback rendering.
- Deployed on **Vercel** with optimized API response handling, error boundaries, and loading states for full production reliability.

Full-Stack Dating App (Tinder Clone)

Oct 2025

React.js | Node.js | Express.js | MongoDB | Socket.io | JWT | Tailwind CSS

- Built a complete **full-stack MERN dating application** with a React.js frontend and Node.js/Express.js REST API backend featuring dedicated **API endpoints** for user management, a matching algorithm, and messaging.
- Implemented **real-time bidirectional chat** using Socket.io - enabling instant message delivery between matched users with online/offline status indicators and typing indicators.
- Built secure **JWT-based authentication** with bcrypt password hashing, refresh token rotation, and protected route middleware handling the complete user auth lifecycle.
- Designed a **MongoDB schema** with Mongoose - modeling Users, Matches, and Messages collections with optimized queries for swipe, match, and chat functionality.

17+ Live Production Websites

2024 - 2025

WordPress | PHP | WooCommerce | HTML | CSS | JavaScript | Elementor

- Developed and deployed **17+ production websites** serving a combined **500,000+ monthly page views** - including *mycountrymobile.com*, *acepeak.ai*, *ringflow.com*, *telo.com*, *callmama.com*, *twiching.ai*.
- Built **custom WordPress themes** and WooCommerce stores using PHP, including custom post types, taxonomies, ACF fields, and tailored template-level modifications to meet specific client requirements.
- Achieved consistent **85+ PageSpeed scores** across all sites through image optimization, caching configuration, and performance tuning techniques.

Education

Bachelor of Science (B.Sc.) in Information Technology

May 2023

Mumbai University, Mumbai, India

Certifications

- **React.js Certification Course** - Udemy 2025
- **SEO Principles** - Semrush Academy 2025
- **Introduction to Frontend Development** - Coursera 2024
- **Python & Django Fundamentals** - Udemy 2024
- **Network Fundamentals** - Cisco Networking Academy 2024
